Nikolai Myshkin

Product Designer / AI Product Builder

Georgia · Remote · holadosli@gmail.com · t.me/nicol_ds · linkedin.com/in/nikolai-myshkin · niko-myshkin.github.io

Summary

I design and build AI products end to end: from research and UX to working code with Claude Code and Codex. Recently shipped Refkit, an open-source tool with an MCP server, and Atlas, a music PWA. I care about craft: calm, minimal interfaces and the details users feel, like gestures, motion and the first screen.

Selected AI projects

Refkit · Library and canvas for AI agents

Open-source beta · niko-myshkin.github.io/refkit · github.com/niko-myshkin/refkit

Designed and built a local library and canvas for Claude Code and Codex: save references, chain agent steps into brand directions, screens and pages; an MCP server gives agents access to it. React/TypeScript, browser extension, Vitest.

Atlas · Music discovery

Working prototype · niko-myshkin.github.io/case-atlas.html (case study and live prototype)

Designed and built a mobile web app with AI coding agents: explore music by place and era through a globe, year dial and throw gesture. Mock catalog with Apple audio previews, installable as a PWA; tested touch interactions and fixed iOS layout issues.

Experience

Foursets · Web designer — Winter 2025 – 2026

UX/UI for internal CMS and admin interfaces and a customer account service; landing pages and corporate websites.

Qualqore · Web & graphic designer / Webflow developer — 2024 – 2025

Took the website from concept and UX to launch in Webflow: visual system, 3D illustrations, CMS, HubSpot forms, SmartRecruiters and multilingual support.

Gcore · Graphic & web designer — May 2020 – May 2024

UX/UI for the internal CRM, customer control panel and UI kit of a cloud/CDN provider; also websites, product visuals and campaigns for marketing.

Upwork · Freelance web & graphic design — 2022 – Present

Freelance · Web & graphic design — 2015 – 2020

UX/UI for web services, user accounts and mobile apps; websites and graphic design.

Dom.ru / ER-Telecom · Web & motion design — 2012 – 2013

Skills

Product & design: UX, interaction design, prototyping, design systems and tokens, Figma, Webflow, motion and 3D.

AI-assisted development: Claude Code, Codex, HTML/CSS/JavaScript, React, TypeScript, APIs, SQLite, MCP, deployment (GitHub Pages), reviewing and testing AI-generated code.

English: working proficiency, fluent in writing.

Education

Cultural Studies · Perm State Institute of Culture — 2005 – 2010
