Nikolai Myshkin

Product Designer / AI Product Builder

Georgia · Remote · holadosli@gmail.com
t.me/nicol_ds · linkedin.com/in/nikolai-myshkin

Summary

Product designer who ships. I take products from research to working code with AI coding agents: three recent products, including an open-source tool with an MCP server and a music PWA. I design the UX and interface, connect APIs and data, and review and test the resulting code.

Selected AI projects

Refkit - library and canvas for AI agents · Open-source beta

Designed and built a local library and canvas for Claude Code and Codex: save references, chain agent steps into brand directions, screens and pages; an MCP server lets agents read and save to the library. React/TypeScript, browser extension, Vitest. Released as an open-source beta with a landing page: github.com/niko-myshkin/refkit.

ATLAS - music discovery · Working prototype

Designed and built a mobile web app with AI coding agents: explore music by place and era through a globe, year dial and throw gesture. Uses a mock catalog with Apple audio previews; installable as a PWA. Tested touch interactions and addressed iOS layout issues in the embedded prototype.

Scout - job-search agent · In development

Building a React/TypeScript app with a Python API and SQLite to collect vacancies, score them against profile rules, and generate fit assessments and cover letters through Claude or GPT. Includes a Python test suite; applications remain under user control.

Experience

Foursets - Web designer (Winter 2025-2026 · 3 months)

Designed landing pages, corporate websites and internal CMS interfaces.

Qualqore - Web & graphic designer / Webflow developer (2024 - 2025)

Took the website from concept and UX to launch in Webflow. Built the visual system, 3D illustrations and CMS; integrated HubSpot forms, SmartRecruiters and multilingual support for the marketing team.

Gcore - Graphic & web designer (May 2020 - May 2024)

Designed websites, product visuals and campaigns for a cloud/CDN provider, and worked on product design tasks for its CRM. Collaborated with developers and copywriters.

Upwork - Freelance web & graphic design (2022 - Present)

Dom.ru / ER-Telecom - Web & motion design, telecom (2012 - 2013)

Skills

Product & design: UX, interaction design, prototyping, design systems and tokens.
AI-assisted development: Claude Code, Codex, HTML/CSS/JavaScript, React, TypeScript, APIs, SQLite, MCP, reviewing and testing AI-generated code.
English: working proficiency, fluent in writing.

Education

Cultural Studies · Perm State Institute of Culture (2005 - 2010)
